

Transcript of Malcolm Frost clip

I had a good lot of people around me, er, the work was interesting and because we were, at that stage, we were the world leaders in, what I would know as erm, stabilised platforms, which would, hold a camera, or laser, and er, the stabilised platform was, would take out the effects of vibration of the aircraft, therefore the sightline of the camera, er, or laser would be kept stationary, it wouldn't er fluctuate because of what the aircraft was doing, erm, and we were, had various platforms, the first which was called, erm Heli Tele, er, which were big white sphere, which was hung on the side of a helicopter. Basically, it was a colour TV camera, and er [pause], that was sold, to the BBC.
